- Do not look directly at the LED light beam while the fixture is on.

For power supply, do not connect in series much more than 7 units, use another mains supply for next 7 units.

## Installation

The unit should be mounted via its screw holes on the bracket. Always ensure that the unit is firmly fixed to avoid vibration and slipping while operating. Always ensure that the structure to which you are attaching the unit is secure and is able to support a weight of 10 times of the unit's weight. Also always use a safety cable that can hold 12 times of the weight of the unit when installing the fixture.

The equipment must be fixed by professionals. And it must be fixed at a place where is out of the touch of people and has no one pass by or under it.

## Technical Specifications

- three kinds of operation mode: DMX Master & Slave.  
sound control
- POWER CONSUMPTION:200W
- DMX Channel mode: 6/10CH
- The built-in program control light in the master and slave mode by voice control.
- 0~100% smooth dimming function and effect of each variety of trobe
- suitable for disco, bar, mobile DJ etc.
- Voltage: AC 100~240V, 50/60Hz
- LEDs:LEDs:18PCS\*12W(6 in 1)
- Net weight: 2.5kgs
- Measure: 278\*271\*123mm

## How to Set the Fixture

- 1.The indicating light
- 2.Function display: display menu and the selected function
- 3.Menu button
- 4.Microphone
- 5.DMX signal output
- 6.Power supply socket
- 7.DMX signal input

## DMX Mode

Select the Addr menu, press the ENTER key to confirm. Then use the initial address code DOWN/UP button to set this light (A001 ~ A512). Once you have set your initial address code, press ENTER to define and save. Not to make any changes, wait a minute to automatically exit the menu and save. The main menu, please press the MENU button

## Channel selection model

Select the Chnd menu, press the ENTER key to determine. To use the DOWN/UP button to channel mode: 6Ch (6 Channel).10Ch (10 Channels) mode. Select the desired channel mode, press ENTER to determine and save. Not to make any changes, wait a minute to automatically exit the menu and save. The main menu, please press the MENU button

## Master/Slave mode

Select the SLnd menu, press the ENTER key to confirm. To use the DOWN/UP key set of Master-Slave mode need: NAST(master.SL 1 (Slave 1).SL 2(Slave 2).SL 3(Slave 3).SL 4(Slave 4). Select the desired mode, press ENTER to determine and save. Not to make any changes, wait a minute to automatically exit the menu and save. The main menu, please press the MENU button

## Performance mode

Select the Shnd menu,press the ENTER key to determine.To use DOWN/UP button to performace mode:FADE(Gradient),SOUN(Sound),.Auto(Automatic),COLOR(Color) mode,Select the desired mode,press ENTER to determine and save.Not to make any changes,wait a minute to automatically exit the menu and save.The main menu, please press the MENU Button FADE(Gradient)SP 1-SP 8 8 fades speed selection.use DOWN/UP button to select the gradient speed required.according to ENTER,determine and save.Not to make any changes,wait a minute and automatically exit the MENU and save.The main menu,plase press the MENUbutton Color(Color)CO 1-CO 16 16 program mode,And also press Stro(Strobe) have 0-255 to adjust the speed,use the DOWN/UP button to select the desired mode.Press ENTER to determine and ave. NOT to make any changes,wait a minute to automatically exit the menu and save.

## Backlight mode

Select the LED menu, press the ENTER key to determine. Then use the DOWN/UP button to set the backlight mode: ON (Open). OFF (Close). Select the desired mode, press ENTER to determine and save. Not to make any changes, wait a minute to automatically exit the menu and save. The main menu, please press the MENU button

## White Balance

Select the BALA menu, Press the ENTER key to determine. To use the DOWN/UP to display mode: Red (Red), Gree (Green, Blue (Blue), select the desired mode, Press ENTER to determine and save. Not to make any changes, Wait a moment to automatically exit the menu and save. The main menu, Please press the MENU button Red (Red) with 125-255 using the DOWN/UP button to brightness. Press ENTER to define and save. Not to make any changes, wait a minute to automatically exit the menu and save. The main menu, Please press the MENU button Gree (Green) with 125-255 using the DOWN/UP button to brightness. Press ENTER to define and save. Not to make any changes, wait a minute to automatically exit the menu and save.

## show positive and negative direction

Select the dISP menu, press the ENTER key to determine. To use the DOWN/UP button to display mode: dISP (positive). DSIP (reverse). Select the desired mode, press ENTER to determine and save. Not to make any changes, wait a minute to automatically exit the menu and save. The main menu, please press the MENU button

## Auto-test

Select the T<sub>est</sub> menu, press the ENTER key to determine. The machine will start automatically detect color. Not to make any changes, wait a minute to automatically exit the menu and save. The main menu, please press the MENU button

## Fhrs

Select the Fhrs menu, press the ENTER key to determine. You can see the use of machine time / h. Not to make any changes, wait a minute to automatically exit the menu and save. The main menu, please press the MENU button

## temperature

Select the T<sub>emp</sub> menu, press the ENTER key to determine. You can see the machine light board temperature / degree. Not to make any changes, wait a minute to automatically exit the menu and save. The main menu, please press the MENU button

# DMX512 Connections

The DMX512 is widely used in intelligent lighting control, with a maximum of 512 channels.

Termination reduces signal errors and avoids signal transmission problems and interference. It is always advisable to connect a DMX terminal. (Resistance 120 ohm 1/4W) between pin2(DMX-) and pin3(DMX+) of the last fixture.

## 6CH Channel mode

## Fixture Cleaning

The cleaning of internal must be carried out periodically to optimize light output. Cleaning frequency depends on the environment in which the fixture operates: damp, smoky or particularly dirty surrounding can cause greater accumulation of dirt on the fixture's optics.

- Clean with soft cloth using normal glass cleaning fluid.
- Always dry the parts carefully.
- Clean the external optics at least every 20 days. Clean the internal optics at least every 30/60 days.
