

61*30W Moving Head Wash Light

Thank you to choose our 61x30W movinghead wash light. To use this product correctly and safely, please carefully read the instructions before installing and using it. This manual contains important installation and application information. Please strictly follow the instructions when installing and operating the product. Meanwhile, please keep this manual properly.

1. Remove the packing

For the correct and safe use of this product, please read the instructions carefully before installing and using this product. This instruction contains important installation and application information, and please strictly follow the operation steps in the instructions when installing and operating the product. At the same time, please keep this instruction properly.

The 61x30W movinghead wash light is designed and produced in strict accordance with CE standards, and comply with the international standard DMX512 signal protocol. They can be used separately or online, and have the characteristics of fast rotation, low noise and powerful functions. They are suitable for small and medium-sized concerts, theaters, studios, nightclubs and bars.

Please be careful to remove the package. After removing the package, check whether the product is damaged during transportation and check whether the following contents are complete.

61x30W wash movinghead light----1

signal cable----1

Instruction manual----1

power cord----1

2. Safety instructions

Attention! Please be careful before operating this product. This product is a high voltage product, and you may be electrocuted if you touch the wire!

This product is in good condition before leaving the factory. In order to maintain the good condition of this product and ensure safe operation, users should follow the safety matters and warnings in this manual.

Important: Damage caused by non-compliance with this manual is not covered by the warranty. The supplier is not responsible for product problems arising therefrom.

If the product has been exposed to extremely unstable temperature environment (such as after transportation), please do not immediately connect the power supply of the product, because the water droplets caused by temperature changes may damage the product. Please use the product after it has returned to normal temperature.

This product can be used in the voltage range of AC 90-240V, which is used indoors. Please ensure that the ground voltage is not higher than the range that the product can withstand!! The power plug must be plugged into a class I socket with good protection. The green or tea-colored conductor must be grounded.

Please check the power cord of this product regularly. Ensure that the power cord is not folded or damaged, and do not connect it to other wires! Pay special attention when connecting the power cord or related wires. Unplug the power cord before using this product or cleaning.

Before using the product, please familiarize yourself with the operation function of the product. Please do not let children or unprofessional personnel touch the product.

Please do not shake this product. Do not use brute force when installing or operating the product. Do not allow unprofessional personnel to operate the product. Most damage is caused by unprofessional operation.

The product is not equipped with relevant maintenance parts. The maintenance and repair of the product can only be carried out by professionals!

Please do not change this product without authorization, otherwise the product may be damaged, so the damage caused is not covered by the warranty. In addition, unprofessional operation may lead to short circuit, burns or electric shock, etc.

3. Operation instructions

--This product is a movinghead wash light, used to create the wash effect of performance.

--If the product has been exposed to a large temperature difference (for example, after transportation), do not start the product immediately, because the hot account cold shrinkage will damage the product. Please

wait until the equipment reaches normal room temperature before starting the product.

--Pay attention to shockproof. Avoid strong collision during installation.

--Please do not lift the entire product through the light head, because the mechanical damage of the equipment may be caused.

--When selecting the installation location, make sure the product is not exposed to overheating, too wet or dusty places. Do not place any wires on the ground, otherwise there may be a risk of electric shock.

--Before installing the product, make sure that the installation point is safe

--Secure the product with a safety rope and check all screws for correct installation

--Please ensure that the lens is in good condition. When the lens is damaged or scratched, please replace the lens.

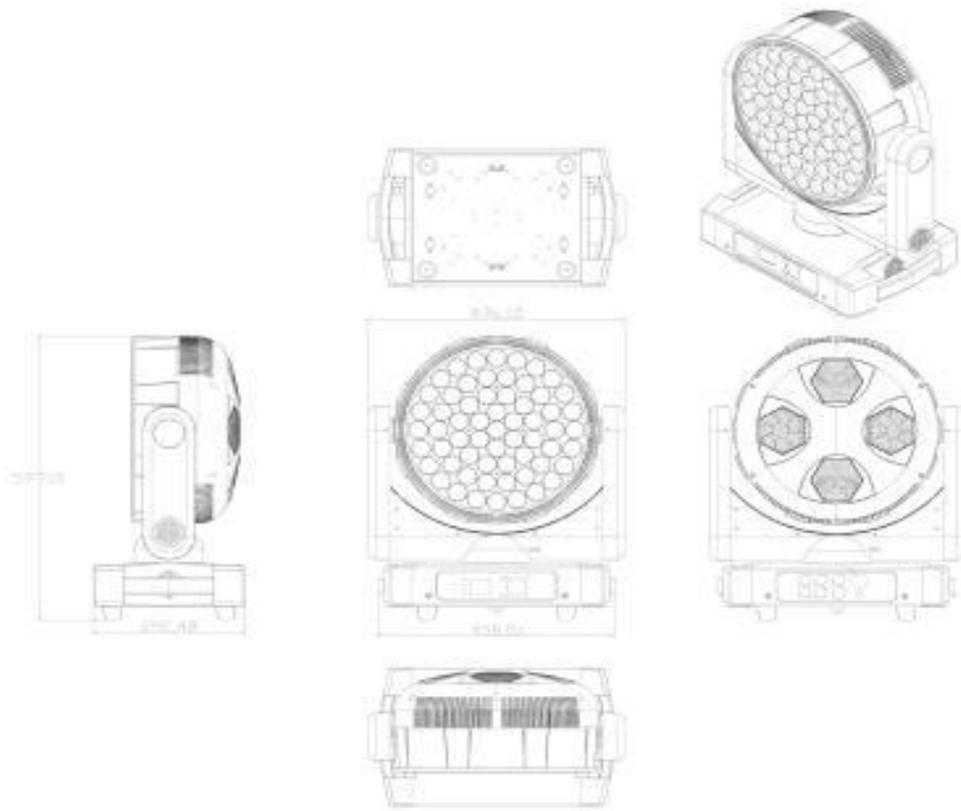

It is recommended that the product be operated by a technician familiar with the product. Non-technical personnel are prohibited from operating this equipment, because many losses are the result of non-professional operation.

--Please keep the packing materials properly in case of secondary transportation.

--Do not change the product without the guidance of the manufacturer or distributor.

--Any equipment failure caused by not operating the equipment according to the instructions is not covered by the warranty. And any accident caused by short circuit, injury, electric shock, ultraviolet light, bulb explosion and so on are not covered by the warranty.

4. Product size diagram

5. Product Parameter

Voltage: AC100V~240V 50/60Hz

Rated power: 2000W

Light source: 61 x 30W RGBW LED 6065

Internal auxiliary LED: 366 x 0.2W LED 3535RGB

External auxiliary LED: 93 x 0.2W LED 5050RGB

Life time: 30000 hours

Colors: R,G,B,W

Focus: 5° -48° DMX linear focusing

Color temperature control: CTO DMX linear dimming

Electronic strobe, 0.3-25 times/second, can choose synchronous or asynchronous random strobe

Dimming: Electronic dimming with 0-100% linear adjustment, with gamma curve dimming frequency adjustable from 1.2K to 25K, macro

command dimming with linear stability and smoothness without flicker, using stable constant current drive and power supply, suitable for video recording and shooting

Rotation angle: The XY axis is driven by a high-speed silent 60 thick three-phase motor, coupled with a high-precision imported magnetic coding positioning device, making the operation positioning more accurate. When there is a misoperation, it can automatically return to its original position, and the horizontal and vertical speeds can be adjusted; XY axis rotation function and reverse function

Horizontal direction: 540° (16 bit precision scan),

Vertical direction: 270°(16 bit precision scan)

Control mode: 21 (simplified) 21CH/49CH/204CH/232CH/265CH

(standard) 5 channel control modes, standard DMX512 protocol, RDM protocol

Control interface: DMX512 interface (3-core/optional 5-core), power cord handle socket

Sleep function: Advanced technology is used to achieve remote sleep function. When the light fixture disconnects the signal, it automatically enters sleep mode, making the light fixture more stable and safe

Display function: 2.8-inch touch screen display, bilingual menu in Chinese and English, sensor fault display, temperature display

Heat dissipation system: using high conductivity copper tube heat sink, fan intelligent monitoring technology automatically adjusts fan speed according to light temperature, built-in overheat protection intelligent system/intelligent temperature and noise balance module

Support network protocol Artnet and upgrade interface with USB

Working temperature: -10° C~45° C

Packaging: waterproof and shockproof aviation box or cardboard box

Net weight: 22.45 kg

Gross weight: 25.5kg

Carton size: 59.5 * 56.5 * 50cm

6. channel table

CH 21	CH 49	CH 204	CH 232	CH 265	function	DMX numeric value	description
